

RR2 Dualgas

Station for recharging CAR air conditioners for R134a- and HFO1234yf-gas.

CODE: T01.007.00 - RR2 DUALGAS
(With printer and heating belt)

CODE: T01.007.01 - RR2 DUALGAS
(With Ethernet module, printer and heating belt)

Standard equipment:

- HP and LP hoses and quick couplings kit for R134a-gas
- HP and LP hoses and quick couplings kit for HFO1234yf-gas
- Oil bottle for hybrid cars
- Double printer
- Cylinders heating
- TopAuto Clima Control

Optional equipment:

- Ethernet module
- Wi-Fi module
- Pipes holder bracket
- Internal accelerometer

TopAuto offers a full range of latest generation fully automatic air conditioning charging stations. The new machines stand out for their modern design and their reliability. As a result of careful research and years of experience, they are also built with the best quality Italian components as well as with our technicians' care and expertise. All this in order to guarantee a simple and safe use to each mechanic. The new range can be ordered for both R134A and HFO1234YF gases.

Technical information

Technical features

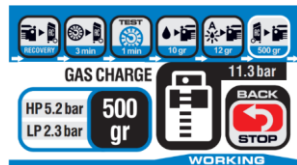

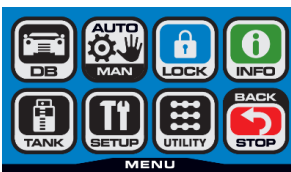

Simultaneous use with R134A- and HF01234YF-gas	Yes
Vacuum pump	2 x 113 l/min
Internal tank	2 x 10 Kg
Compressor	2 x 10 cc (300 gr/min)
Filter Drier capacity	2 x 150 Kg
Recovery percentage	>95 %
Pressure sensors	Yes
Oil bottles	6 + 1 (hybrid cars)
Oil scale	2
Gas scale	2
Precision of oil scale	+/- 1 gr
Precision of gas scale	+/- 1 gr
Length of service hoses	3 m (extendable up to 6-9 m)
Display	2 x 4.3" Colour touchscreen
Keyboard	Touchscreen + manual
Languages	10
Automatic hoses compensation	Yes
Database for hybrid cars	Yes
Status light	Yes
USB	Yes
Wi-Fi	optional
Remote control via smartphone	optional
Power supply	230V, 50/60 Hz, 800-3200W
Weight	130 Kg

Possibility of simultaneous use

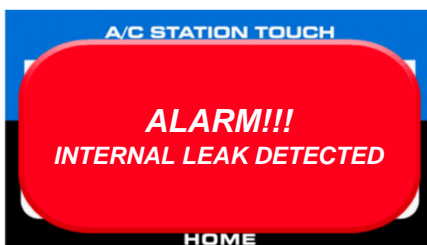

Thanks to the innovative hydraulic circuit, this ultra-modern station for recharging air conditioners can manage two different gases without having any contact between them. It is therefore possible to operate on two cars at the same time.

TopAuto ClimaControl: the simple and intuitive software

We have created an intuitive and easy-to-understand software: thanks to the summary of the work phases shown by ClimaControl, the operator will always be informed about the progress of the procedure, as well as the estimated remaining time for its completion. ClimaControl also allows you to use your RR station remotely, through a smartphone (iOS / Android) or a PC (MacOS / Windows), thanks to which you can view directly on your device in mirror screen-mode the same screens you would see on your RR station; moreover, it allows you to control the machine remotely.

Automatic internal leaks control

Thanks to the advanced internal control system, the station will automatically alert the operator if internal leaks are detected.

Status lights

The high intensity RGB LED strip placed on the front shield allows the operator to dedicate himself to other tasks during the execution of the automatic procedure. Depending on the colour he will be able to understand the machine status:

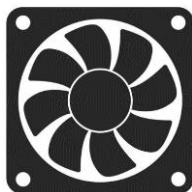

Green: procedure completed
 Blue: Standby
 Red: Error

Ethernet and WI-FI modules

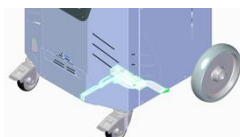

TopAuto A/C stations can be equipped with an ethernet module and a Wi-Fi module. In addition to the remote control via smartphone or PC, it is also possible to save data on a PC and receive remote technical assistance thanks to our Customer Support by simply connecting to internet.

Extra fan system

The station is equipped with 4 high-efficiency fans that avoid any risk of gas stagnation inside.

Scale lock system

All our stations are equipped with a mechanical lock system that protects the gas scale sensor during transport.
